

E-SAFETY POLICY

The Write Time (TWT) recognises that ICT, the internet, and internet-enabled technologies and applications are fantastic tools for learning and communication that can be used at TWT to enhance the curriculum, challenge students, support creativity and independence, and promote positive collaboration and communication. Using ICT to interact socially and share ideas can benefit everyone in the TWT community, but it is important that the use of the internet and ICT is seen as a responsibility, and that students, staff and parents/carers use it appropriately and follow good e-safety practices. All members of the TWT community must be aware of the risks associated with using the internet and how they should conduct themselves when online.

E-safety covers the internet, but it also covers mobile phones/devices and other electronic communications technologies. We know that some adults and young people will use these technologies to harm children. There is a 'duty of care' for any persons working with children and educating all members of the TWT community on the risks and responsibilities of e-safety falls under this duty. There must be a balance between controlling access to the internet and technology and allowing freedom to explore and use these tools to their full potential. This policy aims to aid in regulating ICT activity at TWT and provide a good understanding of appropriate ICT use that members of the TWT community can use as a reference for their conduct online. E-safety is a whole-business issue and responsibility.

Cyberbullying by students will be treated as seriously as any other type of bullying and will be managed through our anti-bullying policy and procedures.

1. Roles and responsibility

The Managing Director and all staff will ensure that the E-safety policy is implemented daily and compliance with the policy is monitored.

2. Communicating TWT Policy

All staff are provided with access to the E-safety policy.

3. Making use of ICT and the internet at TWT

Using ICT and the internet at TWT brings many benefits to students, staff and parents/carers. The internet is used at TWT to raise educational standards, promote student achievement, and support the professional work of staff. Technology is advancing rapidly and is a huge part of everyday life, education and business. We want to equip our students with all the necessary ICT skills that they will need to enable them to progress confidently into a professional working environment when they leave TWT.

In common with other media such as magazines, books and video, some material available via the internet is unsuitable for students. TWT will take all reasonable precautions to ensure that users access only appropriate material. However, due to the international scale and linked nature of internet content, it is not possible to guarantee that unsuitable material will never appear on a TWT computer. TWT cannot accept liability for the material accessed or any consequences of internet access.

4. Learning to evaluate internet content

With so much information available online students must learn how to evaluate internet content for accuracy and intent. This is approached by TWT as part of digital literacy across all subjects in the curriculum. Students will be taught:

- to be critically aware of materials they read and shown how to validate information before accepting it as accurate.
- to acknowledge the source of information used and to respect copyright.

5. SENSO

To ensure our pupils are safe while using ICT equipment and the internet in school, TWT implemented the use of SENSO. This enables teachers to monitor computers and laptops while pupils are using it. Teachers can block websites which pupils may access and lock the computers if necessary. Whenever pupils search for topics which may be linked to any safeguarding concerns or misuse, an alert is sent to SLT/DSL/DDSLs, and the matter is addressed accordingly.

6. Managing information systems

TWT and their IT support service are responsible for reviewing and managing the security of the computers and internet networks as a whole and take the protection of TWT data and the personal protection of our community very seriously. This means protecting the network, as far as is practicably possible, against viruses, hackers and other external security threats. The security of the information systems and users will be reviewed regularly by the IT Support team, and virus protection software will be updated regularly. Some safeguards that TWT take to secure our computer systems are:

- Making sure that unapproved software is not downloaded to any computer. Files held on the network will be regularly checked for viruses.
- The use of user logins and passwords to access the TWT network will be enforced.
- Portable media containing TWT data or programmes will not be taken off-site without specific permission from a member of TWT.
- Making sure that our IT support team regularly update filtering and monitoring systems to protect pupils and staff from harmful and inappropriate content online
- Update, search and block databases to always ensure both student and data safety and security

For more information on data protection at TWT, please refer to our Data Protection/ GDPR policy.

7. Emails, Social Media, and Mobile Phones

TWT uses emails, social media, and mobile phones internally for staff, and externally for contacting parents and young people and is an essential part of TWT communication.

TWT have the right to monitor emails, social media, and business mobile phone logs and their contents but will only do so if there is suspicion of inappropriate use.

Staff should be aware of the following when using email, social media, and mobile phones at TWT:

- Staff should only use official TWT email accounts for TWT-related matters, contact other professionals for work purposes and communicate with students, parents or carers. Personal email accounts should not be used to contact any of these people.
- Emails sent from TWT accounts should be professionally and carefully written. Staff are always representing TWT and should take this into account when entering any email communications.
- For any awkward, sensitive, easily misinterpreted situations or anything that may have legal repercussions, staff should have the content of their email checked carefully by another member of staff.
- Staff must tell the Managing Director of TWT if they receive any offensive, threatening or unsuitable emails either from within TWT or from an external account. They should not attempt to deal with this themselves.
- Staff must not contact learners outside of their standard business working hours of Monday to Friday, 8 am to 5 pm. If contact is to be made outside of these times, employees must get written (email) authorisation from their line manager.
- Under no circumstance should any employee of TWT contact any learner through their own personal social media profiles, personal home or mobile telephone, or personal email account. If a learner somehow contacts an employee of TWT using the employee's networks (phone, email, social media), it must immediately be reported to the employee's line manager.

Students should be aware of the following when using email at TWT, and will be taught to follow these guidelines through the embedded ICT curriculum and in any instance where email is being used within the curriculum or in class:

- Young people may only use approved email accounts on the TWT system.
- Students are warned not to reveal personal details of themselves or others in email communication or arrange to meet anyone without specific permission. Excessive social emailing can interfere with learning and in these cases will be restricted.
- Students should immediately inform a member of staff if they receive any offensive, threatening or unsuitable emails either from within TWT or from an external account. They should not attempt to deal with this themselves.

8. Published content and the TWT website

The TWT website is viewed as a useful tool for communicating our ethos and practice to the wider community. It is also a valuable resource for parents, students and staff for keeping up to date with TWT news and events, celebrating TWT achievements, and personal achievements and promoting TWT projects.

The website is in the public domain and can be viewed by anybody online. Any information published on the website will be carefully considered in terms of safety for the TWT community, copyrights, and privacy policies.

The TWT admin staff are responsible for publishing and maintaining the content of the TWT website. The website will comply with TWT's guidelines for publications including respect for intellectual property rights

and copyright. Staff and students will be made aware of copyright in respect of material taken from the internet.

Students should not publish anything on the internet involving TWT unless permission has been granted by a member of TWT Senior Leadership.

Under the Data Protection Act 2018, images of students and staff will not be displayed in public, either in print or online, without specific consent from a parent/carers (for learners 16 and under), or the 16+ learner.

Using photographs of individual children

The vast majority of people who take or view photographs or videos of children do so for entirely innocent, understandable and acceptable reasons. Sadly, some people abuse children by taking or using images, so we must ensure that we have some safeguards in place.

Published images must not identify students or put them at risk of being identified. Only images created by or for TWT will be used in public and children may not be approached or photographed while at TWT or doing TWT activities without TWT's permission, except for parents taking photographs or videos at TWT events involving their son or daughter for personal use only (as defined by the Information Commissioner's Office ICO).

TWT follows general rules on the use of photographs of individual children:

- Consent from parents will cover the use of images in all TWT publications, on the TWT website, and in videos made by TWT or in class for TWT projects.
- Unpublished electronic and paper images will be stored securely.
- Images will be carefully chosen to ensure that they do not pose a risk of misuse. This includes ensuring that students are appropriately dressed. Photographs of activities which may pose a greater risk of potential misuse (for example, swimming activities), will focus more on the sport than the students (i.e., a student in a swimming pool, rather than standing by the side in a swimsuit).
- For public documents, including in newspapers, full names will not be published alongside images of the child without written permission from parents/carers. Groups may be referred to collectively by year group or form name.
- Events recorded by family members of the students such as TWT productions or sports events must be used for personal use only.
- Students are encouraged to tell a member of staff if they are concerned or uncomfortable with any photographs that are taken of them, or they are being asked to participate in.
- Any photographers that are commissioned by TWT will be fully briefed on appropriateness in terms of content and behaviour, will always wear identification, and will not have unsupervised access to the students.

Complaints of misuse of photographs or video

Parents/carers should follow the standard TWT complaints procedure if they have a concern or complaint regarding the misuse of TWT photographs. Any issues or sanctions will be dealt with in line with TWT policy.

Social networking, social media, and personal publishing

Personal publishing tools include blogs, wikis, social networking sites, bulletin boards, chat rooms and instant messaging programmes. These online forums are the more obvious sources of inappropriate and harmful behaviour and where students are most vulnerable to being contacted by a dangerous person. We must educate students so they can make informed decisions and take responsibility for their conduct online. TWT will normally block/filter access to social networking sites.

Social media sites have many benefits, however, both staff and students should be aware of how they present themselves online. Students are taught through the ICT curriculum and PSHE/RSE about the risks and responsibility of uploading personal information and the difficulty of taking it down completely once it is out in such a public place. TWT follows general rules on the use of social media and social networking sites:

- Students are educated on the risks posed by social networking sites and how to use them in safe and productive ways. Students are advised never to give out personal details of any kind which may identify them or their location. They are all made fully aware of TWT's code of conduct regarding the use of ICT and technologies and behaviour online.
- Any sites that are to be used in class will be risk-assessed by the teacher in charge before the lesson to ensure that the site is age-appropriate and safe for use.
- Official blogs/posts created by staff or students as part of the TWT curriculum will be moderated by a member of staff.
- Students and staff are encouraged not to publish specific and detailed private thoughts, especially those that might be considered hurtful, harmful, or defamatory. TWT expects all staff and students to remember that they are always representing TWT and must act appropriately.

9. Mobile phones and personal devices

Mobile phones and other personal devices are now an important part of everyone's life and have considerable value, particularly concerning individual safety. Whilst these devices are commonplace in today's society, their use and the responsibility for using them should not be taken lightly. Some issues surrounding the possession of these devices are:

- they can make students and staff more vulnerable to cyberbullying.
- they can be used to access inappropriate internet material.
- they can be a distraction in the classroom.
- they are valuable items that could be stolen, damaged, or lost.
- they can have integrated cameras, which can lead to child protection, bullying and data protection issues.

TWTs expectation is that mobile devices, when authorised, will be always used responsibly and certain measures are taken to ensure that students adhere to this expectation. Students must only use these devices outside of lessons when given specific approval, and only in lessons, under special circumstances & direction of the teacher.

- TWT will not tolerate cyberbullying against either students or staff. Sending inappropriate, suggestive, or abusive messages is forbidden and anyone who is found to have sent a message of such content will face appropriate sanctions.

- Mobile phones/devices can be confiscated by a member of staff, as stated within the TWT Group Agreement.
- Mobile phones, unless prior arrangements have been made, must be switched off and handed into reception for safekeeping.
- Individual students must take responsibility for their phones and other mobile devices and should ensure that they always take care of them. The normal disciplinary procedures apply in the event of damage to another student's property.
- Headphones/earbuds must not be worn during lessons unless prior permission is given by the teacher.
- Students must not use these devices to broadcast music unless permission to do so has been given.
- Students must ensure that the files stored do not contain violent or pornographic images or other material that is likely to offend. In very serious cases the police may be contacted.
- Parents/ carers should not phone/text students' mobiles during the school day. In an emergency parents /carers should phone the TWT Reception and messages will be passed on as appropriate.
- The use of mobile phones by students whilst on TWT trips is at the discretion of the trip leader.

It should be noted that power supplies for these devices must not be brought to TWT as all electrical devices used at TWT should be PAT safety tested. If students do decide to bring these into TWT, it is their responsibility and TWTs to keep them safe and aware of possible dangers, whilst visually assessing the suitability of the equipment for the purpose.

Mobile phone or personal device misuse: Students

- Students who breach TWT policy relating to the use of personal devices will face sanctions in line with TWTs behaviour policy. Their mobile phone may be confiscated. In the event of confiscation, the member of staff will make arrangements for its return, which would normally be at the end of the school day.
- Students are under no circumstances allowed to bring mobile phones or personal devices into examination rooms with them. If a student is found with a mobile phone in their possession it will be confiscated. The breach of rules will be reported to the appropriate examining body and may result in the student being prohibited from taking that exam.

Mobile phone or personal device misuse: Staff

- Staff should use TWT equipment if photos or videos are being taken as part of the curriculum or in a professional capacity.
- TWT expects staff to lead by example. Personal mobile phones should be switched off or on silent during teaching periods.
- Any breach of TWT policy may result in disciplinary action against that member of staff.

10. Other

- Social media and messaging are not to be accessed during class time unless as part of directed teaching activity.
- Video, audio and photographic recording must not occur without the consent of the student(s) and teacher(s). Consent must be explicit, not implied

11. Cyberbullying

Cyberbullying, as with any other form of bullying, is taken very seriously by TWT. Information about specific strategies to prevent and tackle bullying is set out in the Anti-bullying policy. The anonymity that can come with using the internet can sometimes make people feel safe to say and do hurtful things that they otherwise would not do in person. It is made very clear to members of the TWT community what is expected of them in terms of respecting their peers, members of the public and staff, and any intentional breach of this will result in disciplinary action.

If an allegation of bullying does arise, TWT will:

- take it seriously.
- act as quickly as possible to establish the facts. It may be necessary to examine TWT systems and logs or contact the service provider to identify the bully.
- record and report the incident.
- provide support and reassurance to the victim.
- make it clear to the 'bully' that this behaviour will not be tolerated. If there is a group of people involved, they will be spoken to individually and as a whole group. It is important that children who have harmed another, either physically or emotionally, redress their actions and TWT will make sure that they understand what they have done and the impact of their actions.

If a sanction is used, it will correlate to the seriousness of the incident and the 'bully' will be told why it is being used. They will be asked to remove any harmful or inappropriate content that has been published, and the service provider may be contacted to do this if they refuse or are unable to remove it. They may have their internet access suspended at TWT.

12. Managing emerging technologies

Technology is progressing rapidly, and new technologies are emerging all the time. TWT will risk-assess any new technologies before they are allowed on TWT premises and consider any educational benefits they might have. TWT keeps up to date with new technologies and is prepared to quickly develop appropriate strategies for dealing with new technological developments.

13. Protecting personal data

TWT believes that protecting the privacy of our staff and students and regulating their safety through data management, control and evaluation is vital to whole-school and individual progress. TWT collects personal data from students, parents, and staff and processes it to support teaching and learning and strengthen our pastoral provision.

We take responsibility for ensuring that any data that we collect, and the process is used correctly and only as necessary, and TWT will keep parents/carers fully informed of how the data is collected, what is collected, and how it is used. Results, attendance and registration records, special educational needs data, and any relevant medical information are examples of the type of data that TWT collects.

In line with the Data Protection Act 2018, and following principles of good practice when processing data, TWT will:

- ensure that data is fairly and lawfully processed.

- process data only for limited purposes.
- ensure that all data processed is adequate, relevant and not excessive.
- ensure that data processing is accurate.
- not keep data longer than is necessary.
- process the data under the data subject's rights.
- ensure that data is secure.
- ensure that data is not transferred to other countries without adequate protection.

There may be circumstances where TWT is required either by law or in the best interests of our students or staff to pass information onto external authorities, for example, our local authority or the Department of Health. These authorities are compliant with data protection law and have policies relating to the protection of any data that they receive or collect.

14. Acceptable Use Policy (AUP) for ICT for Staff & Students

Students are responsible for good behaviour when using IT Equipment at TWT and accessing the internet, just as they are in all other aspects of life at TWT. This includes their own mobile devices with internet access. Communications on the network are often public in nature. The code of conduct always applies when using TWT resources and equipment.

Network and internet access are provided for students to conduct research and communicate with others. Access is a privilege, not a right. Access requires responsibility.

Individual users are responsible for their behaviour and communications over the network. They are expected to comply with this code and follow the agreements they have signed, which incorporate this AUP.

User areas on the network will be monitored, and staff may review files and communications to maintain system integrity. TWT's safeguarding duty includes the duty to promote British values to counter the extremist narrative and prevent young people from being radicalised and drawn into terrorism. Should TWT staff suspect that a student has been accessing materials that might lead to radicalisation or extremist behaviour, the incident must be reported immediately to TWT Senior Leadership under the **Prevent Duty**.

During lessons, teachers will guide students toward appropriate materials. Outside of lesson time, you must only access teacher-approved sites which are appropriate for use at TWT.

The following are not permitted:

- Using another user's identity
- Sending or displaying offensive messages or pictures
- Using or displaying obscene language
- Violating copyright laws
- Intentionally wasting limited resources
- Employing the network for commercial purposes
- Using chat, age-restricted, or gambling sites

- Downloading program files/copyright material (e.g., MP3 files) without the express permission of the teacher.

Students should not publish anything on the internet involving TWT unless permission has been granted by the MD and/or Headteacher.

Failure to comply with the code will result in loss of access and further disciplinary action may be taken if appropriate. If applicable, external agencies may be involved. Staff must also abide by this acceptable use policy, with an appropriate disciplinary action in place for staff (please refer to staff handbook).

15. I.C.T. POSTER to highlight certain key areas of the Acceptable Use Policy

Safety: Be careful not to give out personal information (email address, bank details, phone number & passwords) to people/places you don't know.

Meeting someone you have only been in touch with online can be dangerous. Always check with an adult you trust.

Accepting emails, files (pictures, videos, calls & texts from people you don't know) or clicking on links can cause problems including viruses or nasty messages! Ask for advice!

Remember to check information before you believe it. Is the person/website telling the truth? Have you checked with an adult/trusted source? **REMEMBER:** anything you post online/or any app is permanently stored on the Internet and can **NEVER** be deleted.

Tell someone (adult, parent, carer) if someone or something makes you feel worried or uncomfortable, or if you or someone you know is being bullied online.

Truth if you go to an adult for any reason related to ICT, always tell the truth so that we can help you in the best and quickest way. We will never judge you.

Warning that if you go onto illegal age-restricted websites or gaming/gambling websites, ICT privileges will be restricted.

Turn away from anything or anyone you're unsure of, and always ask an adult for further advice.
